seven years after its publication in germany this book is now available to english readers in the german speaking countries the publication led to intense controversies on the significance the goals and the future development of mathematics instruction in schools currently there is much debate in many countries on how to evaluate the findings of

such international comparative studies as timss and pisa debate on which consequences should be taken for designing national curricula and on which reforms of mathematics instruction in schools should be initiated i hope that this book might provide substantial suggestions beneficial to resolving these and similar issues for its major concern is twofold first to determine the essential characteristics of general education in schools and secondly on the basis of this to specify the status of mathematics instruction within the framework of general education in schools due to the fundamental nature of my argument i did not consider it necessary to update the book superficially for the english edition thus i am presenting the book to the english speaking public in its original form the single exception being that i have omitted the original second chapter since that chapter bildung und allgemeinbildung seems to be relevant only to those readers especially interested in german educational debates most of those readers in turn will belong to the german speaking public the omission of this chapter necessitated a few insignificant alterations in the otherwise unchanged introduction and at the beginning of the present second originally third chapter

considering such witnesses of the time as shakespeare dante petrarch michelangelo machiavelli montaigne more and bacon agnes heller looks at both the concept and the image of a renaissance man the concept was generalised and accepted by all its characteristic features were man as a dynamic being creating and re creating himself throughout his life the images of man however were very different having been formed through the ideas and imagination of artists politicians philosophers scientists and theologians and viewed from the different aspects of work love fate death friendship devotion and the concepts of space and time renaissance man thus stood as both as a leading protagonist of his time one who led and formulated the substantial attitudes of his time and as one who stood as a witness on the sidelines of the discussion this book first published in english in 1978 is based on the diverse but equally important sources of autobiographies works of art and literature and the writings of philosophers although she uses florence as a starting point agnes heller points out that the renaissance was a social and cultural phenomenon common to all of western europe her renaissance man is thus a figure to be found throughout europe
